Elaboration (main deliverables)

Vision
- Short executive overview (scope and objectives)

Glossary
- Terms and definitions
- Data Dictionary

Software Requirements Specification
- Use Case Specifications
  - Use Case Model
    - General Actor Descriptions
    - Diagrams of the Use Case Model
      - Use Case Diagram
    - Use Cases
      - Brief Description
      - Flow of Events
        - Basic flow
          - Use Case narrative
          - Primary scenario narrative
        - Alternative flows
          - Secondary/Alternate scenario narratives (if applicable)
      - Special Requirements
      - Preconditions
      - Postconditions
      - Other diagrams
        - System Sequence Diagram (SSD)
        - User Interface Prototype
- Supplementary Specification

Business Model/Domain Model

Design Model
- Use Case Realization Specification
  - Interaction diagrams
  - Design class diagram
- Data Model

Deployment Model
- Deployment diagram of nodes and network configurations

BAIS3130 Software Engineering I: Product Research Concepts

Implementation Model
- Implementation Model overview
    - Diagram of components implemented
- Iteration n
    - Components/subsystems
        - Components/subsystems to be implemented in iteration
        - Preferred order of implementation to be ready for integration in iteration
        - Diagrams of components/subsystems to be implemented in iteration
    - Builds (integration in iteration is divided into increments, each resulting in a build)
        - Construction
            - Build scripts and any other instructions on how build is constructed
            - Baseline records that define versions of items used to construct build
        - Evaluation and test
            - Evaluation criteria
            - Installation and setup instructions to execute and test build
            - Test cases/test procedures/test scripts/test results

Test Model
- Test Cases
- Test Procedures

Software Development Plan
- Risk List
- Requirement Ranking List
- Iteration Plan (detailed plan of first iteration of Construction phase)

Software Architecture Document

Business Case
- Business Bid (for Construction and Transition phases)
    - Prepare the bid (Schedule, effort, and cost for a given level of quality)
- Economic Gains
    - Update the Return on Investment (financial terms, weigh gains against the costs)
